

How to publish in scientific journals?

Professor Filip Dochy

Katholieke Universiteit Leuven

Goals & Topics the PDC will cover

The workshop is aiming at providing key knowledge and skills on how to get your scientific work published. General knowledge will be shared, examples will be given and concrete proposals are shown from the journal Educational Research Review, the EARLI journal that aims also to publish work of junior researchers.

The workshop will cover the following topics:

- When do I submit my paper? How do I submit my paper? Which criteria should it meet before submitting to a journal?
- How do I find the right journal to submit my paper to?
- How do journals evaluate my paper? What can I expect and when?
- How do I revise a paper?
- How do I resubmit a paper?
- How and when do you approach journal editors?

Important: In conjunction with the PDC Goele Nickmans (EARLI Project Manager) and other EARLI members will conduct a session on getting involved in EARLI + EARLI Business Meeting.
